

XC Series

- Meets ASHRAE 90.1 Efficiency Levels
(13 SEER <65 MBH / 11.2 EER > 65 MBH)
- Horizontal Air Conditioning System
- 2 - 8 Tons

Available with
R-410a
Refrigerant

The all-new XC Series from United CoolAir is designed to increase performance and flexibility by building on the original C-Series unit. It offers engineers and designers a versatile horizontal air conditioning package that can be easily adapted to a multitude of cooling applications.

The XC includes all the quality features you've come to expect from United CoolAir along with many more. Draw-through air flow over the coils maximizes performance for better heat transfer. Units are built for dependable performance, utilizing scroll compressors with R-410a refrigerant, premium efficiency blower motors and field-adjustable belt-drive blowers. Other quality features include filter driers, sight glasses and stainless steel evaporator drain pan, now double sloped for positive condensate removal.

Designed for ceiling or slab mounting, installation can be as a single package or split to better position the unit components. An indoor condensing section is standard along with multiple air path configurations. Units are manufactured using readily available components, simplifying lifetime maintenance.

XC Series Features

- Meets 13 SEER < 65 MBH / 11.2 EER > 65 MBH
- R-410a Refrigerant
- Capacity Range 2 - 8 Tons
- Air- and Water-Cooled Models
- Heat Pump Configuration (air & water source)
- Chilled Water Sections
- Independent Control Panels (each section)
- Independent Contacts (motor and electric heat stage)
- Premium Efficiency Motors

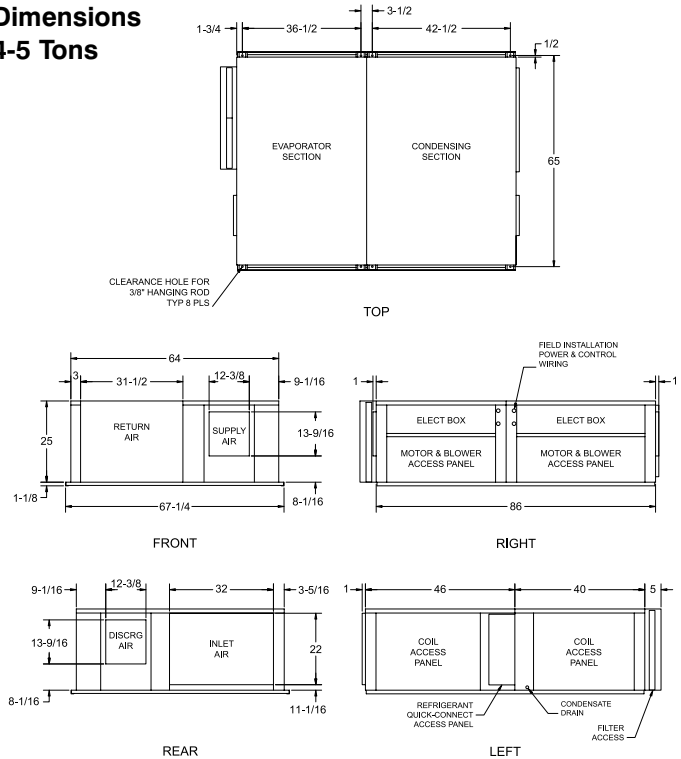

FACTORY TESTED – Each unit is functionally run tested to verify control and component operation.

LIMITED WARRANTY – United CoolAir units are backed by a 1 (one) year Limited Warranty on parts and a 5 (five) year Limited Warranty on the compressor (labor not included). Maintenance items such as belts and filters are excluded under this Limited Warranty.

Dimensions 2-3 Tons

Dimensions 4-5 Tons

Partial List of Options:

- Electric Heat
- Condensate Pump (Externally Mounted)
- Drain Pan Overflow Switch
- Freezestat
- Dry Contacts
- Flooded Condenser
- VFD for Low Ambient
- MagnaCool Package
- Hot Gas Bypass
- Water-Cooled Head Pressure Controls
- Economizers (Air or Water)
- Liquid Receivers
- Suction Line Accumulators
- Oil Separators
- Chilled Water Coil
- Hot Water Coil

All units available in:

- 208/230-1-60
- 208/230-3-60
- 460-3-60
