

UNITED COOLAIR'S

MINICOOL

DUCTLESS AIR CONDITIONING SYSTEM

MINICOOL

**Air- and Water-Cooled
Condensing Units
1-9 Tons**

- ▶ *Condensing Unit and Fan Coils Can Be Split Up to 250 Feet**
- ▶ *Single, Dual or Triple Circuits*

The heart of the MiniCool ductless air conditioning system is its versatile air- or water-cooled **indoor[†] condensing unit**. MiniCool condensing units can be provided with single, dual or triple refrigeration circuits, each having cooling capacities ranging from 1 to 3 tons per circuit. Each circuit contains an accumulator and quench valve for split applications up to 250 feet*. The MiniCool condensing unit can be matched to fan coils requiring cooling only or cooling with electric heat. MiniCool condensing units can be ordered with many commercial options including scroll compressors, internal hot gas bypass and low ambient operation.

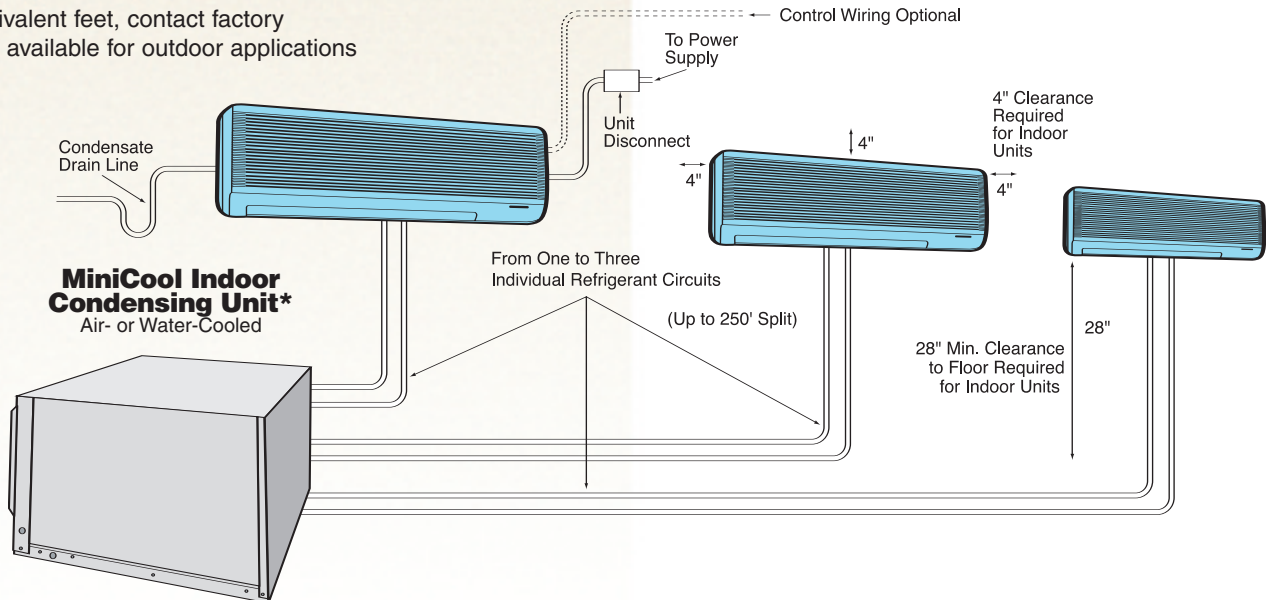

FEATURES

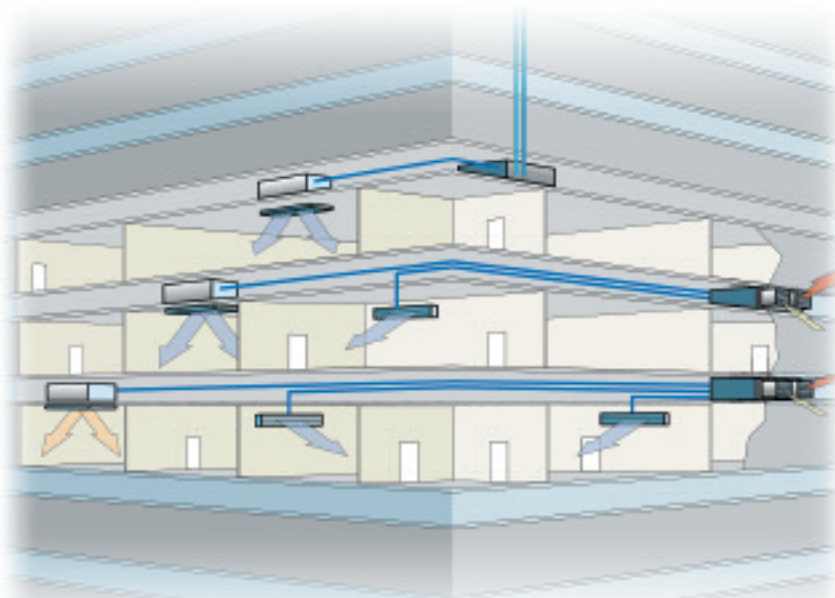

- Built for indoor[†] applications
- Air- or water-cooled design
- Single, dual or triple refrigeration circuits
- Split-able up to 250 feet* from the evaporators
- Cooling Only
- Belt Drive Blower on Air-Cooled Units
- Two-way, 150 psig Water Regulating Valve on Each Water-Cooled Circuit

* Equivalent feet, contact factory

† Also available for outdoor applications

UNITED COOLAIR STRETCHES THE LIMITS OF DUCTLESS AIR CONDITIONING SYSTEMS

The United CoolAir MiniCool system is one of the most flexible air conditioning systems in the industry. It consists of a single- or multi-circuit, air- or water-cooled indoor* condensing section with a variety of fan coil options. This unique system also allows the evaporator fan coils to be split up to 250 equivalent feet from the condensing unit, even on different floors. The condensing unit can have up to three individual refrigerant circuits, each with a capacity from 1 to 3 tons. Each refrigerant circuit is individually controlled. The proven performance of United CoolAir systems ensures the kind of reliability, quality and flexibility that is expected in today's marketplace.

* Also available for outdoor application.
